

Anti-Human/Mouse EPS8L1 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA03800

3th Edition

Description: This gene encodes a protein that is related to epidermal growth factor receptor pathway substrate 8 (EPS8), a substrate for the epidermal growth factor receptor. The function of this protein is unknown. At least two alternatively spliced transcript variants encoding different isoforms have been found for this gene. EPS8L1 (EPS8 Like 1) is a Protein Coding gene. GO annotations related to this gene include actin binding and Rho guanyl-nucleotide exchange factor activity. An important paralog of this gene is EPS8.

Antigen: Synthesized peptide derived from the Internal region of human Eps8L1

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Detected in placenta.
