

Anti-Human/Mouse EPS8L2 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA03805

3th Edition

Description: This gene encodes a member of the EPS8 gene family. The encoded protein, like other members of the family, is thought to link growth factor stimulation to actin organization, generating functional redundancy in the pathways that regulate actin cytoskeletal remodeling. EPS8L2 (EPS8 Like 2) is a Protein Coding gene. GO annotations related to this gene include actin binding and Rac guanyl-nucleotide exchange factor activity. An important paralog of this gene is EPS8.

Antigen: Synthesized peptide derived from the N-terminal region of human Eps8L2

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Detected in fibroblasts and placenta.
