

**Anti-Human Fibulin 2 Polyclonal Antibody**

**Polyclonal Antibody**

**Cat.NO.: PA03927**

---

3th Edition

**Description:** This gene encodes an extracellular matrix protein, which belongs to the fibulin family. This protein binds various extracellular ligands and calcium. It may play a role during organ development, in particular, during the differentiation of heart, skeletal and neuronal structures. Alternatively spliced transcript variants encoding different isoforms have been identified.

**Antigen:** Synthesized peptide derived from the Internal region of human Fibulin-2

**Form:**

**How to use:** 1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:** PBS (pH7.4) containing 1% BSA

**Application:** This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:** Component of both basement membranes and other connective tissues. Expressed in heart, placenta and ovary.
