

Anti-Human/Mouse MOB3A Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA03973

3th Edition

Description: MOB3A (MOB Kinase Activator 3A) is a Protein Coding gene. An important paralog of this gene is MOB3B. MOB3B (MOB Kinase Activator 3B) is a Protein Coding gene. An important paralog of this gene is MOB3A. The protein encoded by this gene shares similarity with the yeast Mob1 protein. Yeast Mob1 binds Mps1p, a protein kinase essential for spindle pole body duplication and mitotic checkpoint regulation. This gene is located on the opposite strand as the interferon kappa precursor (IFNK) gene.

Antigen: Synthesized peptide derived from the N-terminal region of human Mob3A/B

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
