

Anti-Human/Mouse FOXR1 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA04084

3th Edition

Description:FOXR1 is a member of the forkhead box (FOX) family of transcription factors. FOX family members are monomeric, helix turn helix proteins with a core DNA binding domain of approximately 110 amino acids. Many FOX transcription factors play roles in determining cell fates during early development. This forkhead box protein lacks the C terminal basic region found in many other FOX family members. It is located within the 11q23.3 region which is commonly deleted in neuroblastomas.

Antigen:Synthesized peptide derived from the C-terminal region of human FoxR1

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
