

Anti-Human/Mouse/Rat HSP60 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA04124

3th Edition

Description:HSPs is a group of stress protein cells induced by stress stimulation, and it is related to tumorigenesis, proliferation and differentiation. HSPs can be classified into 3 types according to their different molecular weight, and the distribution and function of each type of HSPs are different. HSP60 is mainly used in research of tongue squamous cell carcinoma, colon cancer, pancreatic cancer and breast cancer, which may have prognostic significance.

Antigen:Recombinant Protein

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
