

Anti-Human GCP6 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA04164

3th Edition

Description: The protein encoded by this gene is part of a large multisubunit complex required for microtubule nucleation at the centrosome. TUBGCP6 (Tubulin Gamma Complex Associated Protein 6) is a Protein Coding gene. Diseases associated with TUBGCP6 include Microcephaly And Chorioretinopathy, Autosomal Recessive, 1 and Autosomal Recessive Chorioretinopathy-Microcephaly Syndrome. Among its related pathways are Regulation of PLK1 Activity at G2/M Transition and Chks in Checkpoint Regulation. GO annotations related to this gene include microtubule binding. An important paralog of this gene is TUBGCP2.

Antigen: Synthesized peptide derived from the Internal region of human GCP6

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
