

Anti-Human/Mouse/Rat GNL1 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA04232

3th Edition

Description:The GNL1 gene, identified in the human major histocompatibility complex class I region, shows a high degree of similarity with its mouse counterpart. The GNL1 gene is located less than 2 kb centromeric to HLA-E, in the same transcriptional orientation. GNL1 is telomeric to HLA-B and HLA-C. GNL1 (G Protein Nucleolar 1 (Putative)) is a Protein Coding gene. GO annotations related to this gene include GTP binding and structural molecule activity. An important paralog of this gene is LSG1.

Antigen:Synthesized peptide derived from the N-terminal region of human GNL1

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
