

Anti-Human GNL3L Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA04233

3th Edition

Description:The protein encoded by this gene appears to be a nucleolar GTPase that is essential for ribosomal pre-rRNA processing and cell proliferation. Two transcript variants encoding the same protein have been found for this gene. GNL3L (G Protein Nucleolar 3 Like) is a Protein Coding gene. Among its related pathways are Ribosome biogenesis in eukaryotes. GO annotations related to this gene include poly(A) RNA binding and GTPase activity. An important paralog of this gene is GNL3.

Antigen:Synthesized peptide derived from the Internal region of human GNL3L

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
