

**Anti-Human/Mouse/Rat Granzyme B/H Polyclonal Antibody**

**Polyclonal Antibody**

**Cat.NO.: PA04321**

---

3th Edition

**Description:** GZMB (Granzyme B) is a Protein Coding gene. Diseases associated with GZMB include Natural Killer Cell Leukemia and Lymphocytic Gastritis. Among its related pathways are Allograft rejection and Apoptosis and survival Caspase cascade. GO annotations related to this gene include serine-type endopeptidase activity and serine-type peptidase activity. An important paralog of this gene is GZMH. GZMH (Granzyme H) is a Protein Coding gene. Diseases associated with GZMH include Neuropathy, Congenital Hypomyelinating. Among its related pathways are IL-15 Signaling Pathways and their Primary Biological Effects in Different Immune Cell Types and Granzyme Pathway. GO annotations related to this gene include serine-type endopeptidase activity. An important paralog of this gene is GZMB.

**Antigen:** Synthesized peptide derived from the N-terminal region of human Granzyme B/H

**Form:**

**How to use:** 1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:** PBS (pH7.4) containing 1% BSA

**Application:** This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:** Constitutively expressed in NK cells
