

Anti-Human/Mouse/Rat Acetyl-NRIP1 (Lys158) Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA04439

3th Edition

Description:NRIP1 (Nuclear Receptor Interacting Protein 1) is a Protein Coding gene. Diseases associated with NRIP1 include Infertility and Embryonal Carcinoma. Among its related pathways are Circadian rythm related genes and GPCR Pathway. GO annotations related to this gene include receptor binding and transcription corepressor activity.Nuclear receptor interacting protein 1 (NRIP1) is a nuclear protein that specifically interacts with the hormone-dependent activation domain AF2 of nuclear receptors. Also known as RIP140, this protein modulates transcriptional activity of the estrogen receptor.

Antigen:Synthesized peptide derived from human RIP140 around the acetylation site of K158.

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
