

Anti-Human/Mouse/Rat NLRX1 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA04513

3th Edition

Description:NLRX1 (NLR Family Member X1) is a Protein Coding gene. Among its related pathways are Innate Immune System and Influenza A. An important paralog of this gene is NLRC5.The protein encoded by this gene is a member of the NLR family and localizes to the outer mitochondrial membrane. The encoded protein is a regulator of mitochondrial antiviral responses. Three transcript variants encoding the same protein have been found for this gene.

Antigen:Synthesized peptide derived from NLRX1

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:Ubiquitously expressed. Strongest expression in mammary gland, heart and muscle. Detected in HELA, 293T, THP-1, HL60, RAJI, and JURKAT cell lines (at protein level).
