Anti-Human/Mouse JMY Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA04649

3th Edition

Description: JMY (Junction Mediating And Regulatory Protein, P53 Cofactor) is a Protein Coding gene. Diseases associated with JMY include Usher Syndrome, Type 1B. Among its related pathways are Regulation of TP53 Activity and Gene Expression. GO annotations related to this gene include actin binding and transcription coactivator activity. An important paralog of this gene is WHAMM.

Antigen: Synthesized peptide derived from the C-terminal region of human JMY

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:

1/1
