

Anti-Human/Mouse/Rat/Monkey LMO3 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA04765

3th Edition

Description:The protein encoded by this gene belongs to the rhombotin family of cysteine-rich LIM domain oncogenes. This gene is predominantly expressed in the brain. Related family members, LMO1 and LMO2 on chromosome 11, have been reported to be involved in chromosomal translocations in T-cell leukemia. Many alternatively spliced transcript variants have been found for this gene. LMO3 (LIM Domain Only 3) is a Protein Coding gene. An important paralog of this gene is LMO1.

Antigen:Synthesized peptide derived from the C-terminal region of human LMO3

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
