

**Anti-Human/Mouse/Rat LUC7L2 Polyclonal Antibody**

**Polyclonal Antibody**

**Cat.NO.: PA04788**

---

3th Edition

**Description:** This gene encodes a protein that contains a C2H2-type zinc finger, coiled-coil region and arginine, serine-rich (RS) domain. A similar protein in mouse interacts with sodium channel modifier 1, and the encoded protein may be involved in the recognition of non-consensus splice donor sites in association with the U1 snRNP spliceosomal subunit. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. LUC7L2 (LUC7 Like 2, Pre-mRNA Splicing Factor) is a Protein Coding gene. GO annotations related to this gene include poly(A) RNA binding and mRNA binding. An important paralog of this gene is C7orf55-LUC7L2.

**Antigen:** Synthesized peptide derived from the Internal region of human LUC7L2

**Form:**

**How to use:** 1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:** PBS (pH7.4) containing 1% BSA

**Application:** This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:**
