

**Anti-Human/Mouse/Rat MED8 Polyclonal Antibody**

**Polyclonal Antibody**

**Cat.NO.: PA04894**

---

3th Edition

**Description:** This gene encodes a protein component of the mediator complex, which aids in transcriptional activation through interaction with RNA polymerase II and gene-specific transcription factors. The encoded protein may also function in ubiquitin ligation and protein degradation. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. MED8 (Mediator Complex Subunit 8) is a Protein Coding gene. Among its related pathways are Influenza A and Regulation of lipid metabolism by Peroxisome proliferator-activated receptor alpha (PPARalpha). GO annotations related to this gene include RNA polymerase II transcription cofactor activity.

**Antigen:** Synthesized peptide derived from the Internal region of human Med8

**Form:**

**How to use:** 1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:** PBS (pH7.4) containing 1% BSA

**Application:** This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:**
