

Anti-Human/Mouse EYA1/4 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA05008

3th Edition

Description:EYA1 (EYA Transcriptional Coactivator And Phosphatase 1) is a Protein Coding gene. Diseases associated with EYA1 include Otofaciocervical Syndrome and Branchiootoc Syndrome 1. Among its related pathways are DNA Double-Strand Break Repair and Transcriptional misregulation in cancer. GO annotations related to this gene include RNA binding and protein tyrosine phosphatase activity. An important paralog of this gene is EYA4. EYA4 (EYA Transcriptional Coactivator And Phosphatase 4) is a Protein Coding gene. Diseases associated with EYA4 include Cardiomyopathy, Dilated, 1J and Deafness, Autosomal Dominant 10. Among its related pathways are DNA Double-Strand Break Repair and DNA Double Strand Break Response. GO annotations related to this gene include protein tyrosine phosphatase activity. An important paralog of this gene is EYA1.

Antigen:Synthetic peptide from human protein

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
