

**Anti-Human MOV10L1 Polyclonal Antibody**

**Polyclonal Antibody**

**Cat.NO.: PA05044**

---

3th Edition

**Description:** This gene is similar to a mouse gene that encodes a putative RNA helicase and shows testis-specific expression. Multiple transcript variants encoding different isoforms have been found for this gene. MOV10L1 (Mov10 RISC Complex RNA Helicase Like 1) is a Protein Coding gene. Among its related pathways are Gene Expression and Mitotic Prophase. GO annotations related to this gene include RNA binding and ATP-dependent RNA helicase activity. An important paralog of this gene is MOV10.

**Antigen:** Synthesized peptide derived from the Internal region of human MOV10L1

**Form:**

**How to use:** 1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:** PBS (pH7.4) containing 1% BSA

**Application:** This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:** Isoform 1: Specifically expressed in testis.
