

**Anti-Human/Mouse/Rat AZI2 Polyclonal Antibody**

**Polyclonal Antibody**

**Cat.NO.: PA05223**

---

3th Edition

**Description:** AZI2, or NAP1, contributes to the activation of NF $\kappa$ B (see MIM 164011)-dependent gene expression by activating IKK-related kinases, such as NAK. AZI2 (5-Azacytidine Induced 2) is a Protein Coding gene. Among its related pathways are RIG-I/MDA5 mediated induction of IFN-alpha/beta pathways.

**Antigen:** Synthesized peptide derived from the N-terminal region of human Nap1

**Form:**

**How to use:** 1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:** PBS (pH7.4) containing 1% BSA

**Application:** This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:** Widely expressed. Abundant expression seen in the pancreas and testis.
