

Anti-Human NARFL Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA05224

3th Edition

Description:NARFL (Nuclear Prelamin A Recognition Factor Like) is a Protein Coding gene. Diseases associated with NARFL include Commensal Bacterial Infectious Disease. Among its related pathways are Cytosolic iron-sulfur cluster assembly and Metabolism. GO annotations related to this gene include 4 iron, 4 sulfur cluster binding and NADH dehydrogenase activity. An important paralog of this gene is NARF.

Antigen:Synthesized peptide derived from the C-terminal region of human NARFL

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:Widely expressed.
