

Anti-Human/Mouse NET5 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA05251

3th Edition

Description:The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. Alternatively spliced transcripts encoding the same protein have been identified. TSPAN9 (Tetraspanin 9) is a Protein Coding gene. An important paralog of this gene is TSPAN4.

Antigen:Synthesized peptide derived from the Internal region of human NET-5.

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:Expressed in megakaryocytes and platelets (at protein level).
