

Anti-Human NMUR1 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA05296

3th Edition

Description:NMUR1 (Neuromedin U Receptor 1) is a Protein Coding gene. Among its related pathways are Peptide ligand-binding receptors and RET signaling. GO annotations related to this gene include G-protein coupled receptor activity and neuromedin U receptor activity. An important paralog of this gene is NMUR2.

Antigen:Synthesized peptide derived from the N-terminal region of human NMUR1

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:Expressed in greatest abundance in peripheral organs, particularly in elements of the gastrointestinal and urogenital systems with highest levels in testes. In central nervous system structures express levels are much lower than those seen in peripheral organs. Within the CNS, has been detected in highest abundance in the cerebellum, dorsal root ganglia, hippocampus, and spinal cord.
