

Anti-Human PABPC3 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA05506

3th Edition

Description: Messenger RNA stability and translation initiation are extensively under the control of poly(A)-binding proteins (PABP). See PABPC1 (MIM 604679) for background information. PABPC3 (Poly(A) Binding Protein Cytoplasmic 3) is a Protein Coding gene. Among its related pathways are Deadenylation-dependent mRNA decay and RNA transport. GO annotations related to this gene include nucleic acid binding and nucleotide binding. An important paralog of this gene is PABPC1.

Antigen: Synthesized peptide derived from the Internal region of human PABP3

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Testis specific.
