

Anti-Human/Mouse/Rat SFRS15 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA05836

3th Edition

Description: This gene likely encodes a member of the arginine/serine-rich splicing factor family. A similar protein in Rat appears to bind the large subunit of RNA polymerase II and provide a link between transcription and pre-mRNA splicing. Alternatively spliced transcript variants have been described. SCAF4 (SR-Related CTD Associated Factor 4) is a Protein Coding gene. Diseases associated with SCAF4 include Hay-Wells Syndrome and Wells Syndrome. GO annotations related to this gene include nucleic acid binding and nucleotide binding. An important paralog of this gene is SCAF8.

Antigen: Synthesized peptide derived from the Internal region of human SFRS15

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
