

Anti-Human SRSF8 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA05915

3th Edition

Description: This gene encodes a member of a family of proteins containing a ribonucleoprotein (RNP)-type RNA binding motif and a carboxyl-terminal arginine-serine-rich (RS) domain. The encoded protein functions as a pre-mRNA splicing factor. There is a pseudogene for this gene on chromosome 7. Alternative splicing results in multiple transcript variants. SRSF8 (Serine And Arginine Rich Splicing Factor 8) is a Protein Coding gene. Among its related pathways are mRNA Splicing - Major Pathway and Influenza A. GO annotations related to this gene include nucleic acid binding and nucleotide binding. An important paralog of this gene is SRSF2.

Antigen: Synthesized peptide derived from the Internal region of human SRp46

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Strongly expressed in pancreas, spleen and prostate. Weakly expressed in lung, liver and thymus.
