

Anti-Human/Mouse/Rat SS18 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA05961

3th Edition

Description:SS18 (SS18, NBAF Chromatin Remodeling Complex Subunit) is a Protein Coding gene. Diseases associated with SS18 include Sarcoma, Synovial and Sarcoma. Among its related pathways are Transcriptional misregulation in cancer and Chromatin Regulation / Acetylation. GO annotations related to this gene include ligand-dependent nuclear receptor transcription coactivator activity. An important paralog of this gene is SS18L1.

Antigen:Synthesized peptide derived from the N-terminal region of human SYT

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:Fairly ubiquitously expressed. Expressed in synovial sarcomas and in other human cell lines. The fusion genes SSXT-SSX1 and SSXT-SSX2 are expressed only in synovial sarcomas.
