

Anti-Human TBPL2 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA05982

3th Edition

Description: TBPL2 (TATA-Box Binding Protein Like 2) is a Protein Coding gene. Among its related pathways are Respiratory electron transport, ATP synthesis by chemiosmotic coupling, and heat production by uncoupling proteins. and Influenza A. GO annotations related to this gene include transcription factor activity, sequence-specific DNA binding. An important paralog of this gene is TBP.

Antigen: Synthesized peptide derived from the Internal region of human TBPL2

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Ubiquitously expressed in all tissues examined with highest levels in heart, lung, ovary, spleen and testes.
