

**Anti-Human WDHD1 Polyclonal Antibody****Polyclonal Antibody****Cat.NO.: PA06136**

3th Edition

**Description:**The protein encoded by this gene contains multiple N-terminal WD40 domains and a C-terminal high mobility group (HMG) box. WD40 domains are found in a variety of eukaryotic proteins and may function as adaptor/regulatory modules in signal transduction, pre-mRNA processing and cytoskeleton assembly. HMG boxes are found in many eukaryotic proteins involved in chromatin assembly, transcription and replication. Alternative splicing results in two transcript variants encoding different isoforms. WDHD1 (WD Repeat And HMG-Box DNA Binding Protein 1) is a Protein Coding gene. Diseases associated with WDHD1 include Trench Fever. Among its related pathways are Mesodermal Commitment Pathway. GO annotations related to this gene include RNA binding and RNA polymerase binding.

**Antigen:**Synthesized peptide derived from the Internal region of human WDHD1

**Form:**

**How to use:**1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:**PBS (pH7.4) containing 1% BSA

**Application:**This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:**
