

**Anti-Human/Mouse/Rat ABCG1 Polyclonal Antibody**

**Polyclonal Antibody**

**Cat.NO.: PA06225**

---

3th Edition

**Description:**The protein encoded by this gene is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the White subfamily. It is involved in macrophage cholesterol and phospholipids transport, and may regulate cellular lipid homeostasis in other cell types. Six alternative splice variants have been identified.

**Antigen:**Synthesized peptide derived from the C-terminal region of human ABCG1

**Form:**

**How to use:**1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:**PBS (pH7.4) containing 1% BSA

**Application:**This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:**Expressed in several tissues. Expressed in macrophages; expression is increased in macrophages from patients with Tangier disease.
