

Anti-Human/Mouse NME5 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA07014

3th Edition

Description:The NME5 gene encodes a 212-amino acid polypeptide with homology to the NDP kinases. Northern blot analysis detected abundant expression of a 1.1-kb mRNA in testis. In situ hybridization to testis revealed NME5 mRNA in the seminiferous tubules in a pattern consistent with stage-specific expression in germinal cells during spermatogenesis.

Antigen:Recombinant protein of human NME5

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:Specifically expressed in testis germinal cells.
