

Anti-Human GPT Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA07409

3th Edition

Description: This gene encodes cytosolic alanine aminotransaminase 1 (ALT1), also known as glutamate-pyruvate transaminase 1. This enzyme catalyzes the reversible transamination between alanine and 2-oxoglutarate to generate pyruvate and glutamate and, therefore, plays a key role in the intermediary metabolism of glucose and amino acids. Serum activity levels of this enzyme are routinely used as a biomarker of liver injury caused by drug toxicity, infection, alcohol, and steatosis. A related gene on chromosome 16 encodes a putative mitochondrial alanine aminotransaminase.

Antigen: Synthetic peptide of human GPT

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Liver, kidney, heart, and skeletal muscles. Expressed at moderate levels in the adipose tissue.
