

Anti-Human/Mouse PFDN6 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA09874

3th Edition

Description: Prefoldin subunit 6 is a protein that in humans is encoded by the PFDN6 gene. PFDN6 binds specifically to cytosolic chaperonin (c-CPN) and transfers target proteins to it. This protein also binds to nascent polypeptide chain and promotes folding in an environment in which there are many competing pathways for nonnative proteins.

Antigen: Synthetic peptide of human PFDN6

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
