

Anti-Human/Mouse RAB39 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA10733

3th Edition

Description: This gene encodes a small GTP-binding protein that belongs to the largest family within the Ras superfamily. Rab39 is a Golgi-associated protein involved in endocytosis of HeLa cells. It contains conserved motifs referred to phosphate/guanosine binding and a microbody C-terminal targeting signal. Rab39 is mostly detected in epithelial cell lines and expressed ubiquitously in human tissues. It can facilitate endocytosis in HeLa cells when expressed transiently and stably.

Antigen: Synthetic peptide of human RAB39

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
