

Anti-Human c-FLIP Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA11183

3th Edition

Description:The protein encoded by this gene is a regulator of apoptosis and is structurally similar to caspase-8. However, the encoded protein lacks caspase activity and appears to be itself cleaved into two peptides by caspase-8. Several transcript variants encoding different isoforms have been found for this gene, and partial evidence for several more variants exists.
