

Anti-Human/Rat MEP1A Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA11911

3th Edition

Description:Meprin A subunit alpha also known as endopeptidase-2 or PABA peptide hydrolase is the alpha subunit of the meprin A enzyme that in humans is encoded by the MEP1A gene.[1][2]The MEP1A locus is on chromosome 6p in humans and on chromosome 17 in mice. The meprin alpha subunit product of the MEP1A gene is processed in the endoplasmic reticulum during intracellular transport, and is secreted as homomeric meprin A.

Antigen:Recombinant protein of human MEP1A

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
