

Anti-Human/Mouse DCP1A Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA12250

3th Edition

Description:Decapping is a key step in general and regulated mRNA decay. The protein encoded by this gene is a decapping enzyme. This protein and another decapping enzyme form a decapping complex, which interacts with the nonsense-mediated decay factor hUpf1 and may be recruited to mRNAs containing premature termination codons. This protein also participates in the TGF-beta signaling pathway.

Antigen:Recombinant protein of human DCP1A

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:Detected in heart, brain, placenta, lung, skeletal muscle, liver, kidney and pancreas.
