

CST6, 29-149aa, Human, His tag, E.coli (Bioactivity Validated)

Cat.NO.: TP01753

3th Edition

Synonyms:Cystatin-M, Cystatin E/M.

Description:CST6 is a member of the type 2 cystatin family. Some of the members are active cysteine protease inhibitors, while cystatin E/M moderate the inhibition of cathepsin B but is not active against cathepsin C. CST6 is secretable proteins that influence osteogenesis and bone resorption, regulation of the insulin and hepatocyte growth factor receptors, and the response to systemic inflammation. Recombinant human CST6 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
