

DNAJB8, 1-232aa, Human, His tag, E.coli

Cat.NO.: TP01897

3th Edition

Synonyms:DnaJ homolog subfamily B member 8,

Description:DNAJB8, also known as dnaJ homolog subfamily B member 8, is superior suppressors of aggregation and toxicity of disease-associated polyglutamine proteins. DNAJB8 is (de)acetylated at two conserved C-terminal lysines that are not involved in substrate binding, but do play a role in suppressing protein aggregation. Recombinant human DNAJB8 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography.
