Cat.NO.: TP02065

3th Edition

Synonyms:Junctional adhesion molecule A, CD321, JAM, JAM1, JAMA, JCAM, KAT, PAM-1.

Description:F11R, also known as CD321, belongs to the immunoglobulin superfamily. It seems to plays a role in epithelial tight junction formation. Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell sheets, forming continuous seals around cells and serving as a physical barrier to prevent solutes and water from passing freely through the paracellular space.
