

GADD45G, 1-159aa, Human, Recombinant, E.coli

Cat.NO.: TP02178

3th Edition

Synonyms:Growth arrest and DNA-damage-inducible, gamma, CR6, DDIT2

Description:GADD45G is a member of GADD45 family (GADD45?, ?, and ?) that are nuclear proteins to interact with various proteins implicated in stress responses and cell-cycle-related proteins. The function of GADD45 proteins is involved in growth-regulatory mechanisms and apoptosis. GADD45G protein responds to environmental stresses by mediating activation of p38/JNK pathway via MTK1/MEKK4 kinase and its transcript levels are increased following stressful growth arrest conditions and treatment with DNA-damaging agents.
