

GLOD4, 1-298aa, Human, His tag, E.coli

Cat.NO.: TP02255

3th Edition

Synonyms:Glycolase domain-containing protein 4, C17orf25, CGI-150, HC71

Description:GLOD4, also known glyoxalase domain-containing protein 4, is an enzyme that belongs to the glyoxalase system. This system is a set of enzymes that carry out the detoxification of methylglyoxal and the other reactive aldehydes that are produced as a normal part of metabolism. It is a mitochondrial protein that interacts with NUDT9. Recombinant human GLOD4 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography.
