

**Glutathione S-Transferase(GST), 1-224aa, Schistosoma japonicum Recombinant, E.coli**

**Cat.NO.: TP02271**

3th Edition

**Synonyms:**GST class-mu1, GST 1-1, pmGT10

**Description:**Glutathione S-transferase (GST) represents a major group of detoxification enzymes. This enzyme acts by catalyzing the reaction of glutathione with an acceptor molecule to form an S-substituted glutathione (S=sulfur). The reactions utilizing glutathione contribute the transformation of a wide range of compounds, including carcinogens, therapeutic drugs, and products of oxidative stress.

**Form:**Liquid. In Phosphate Buffered Saline pH7.4

**Molecular Weight:**26kDa (224aa)

**Sequences:**

**Purity:**> 95% by HPLC

**Concentration:**1 mg/ml (determined by Bradford assay)

**Endotoxin Level:**<1.0 EU per 1 ug of protein (determined by LAL method)

**Storage:**Can be stored at +4°C short term (1-2 weeks). For long term storage, aliquot and store at -20°C or -70°C. Avoid repeated freezing and thawing cycles.
