

HLA-C, 25-308aa, Human, His tag, E.coli

Cat.NO.: TP02458

3th Edition

Synonyms:HLA class I histocompatibility antigen, Cw-1 alpha chain, D6S204, HLA-JY3, HLC-C, PSORS1

Description:HLA-C belongs to the HLA class I heavy chain paralogues. This class I molecule is a heterodimer consisting of a heavy chain and a light chain (beta-2 microglobulin). The heavy chain is anchored in the membrane. Class I molecules play a central role in the immune system by presenting peptides derived from endoplasmic reticulum lumen. They are expressed in nearly all cells. Recombinant human HLA-C protien, fused to His-tag at Nterminus, was expressed in E.coli and purified by using conventional chromatography techniques.
