Cat.NO.: TP02574

3th Edition

Synonyms:Interferon gamma, IFN-G, IFN-gamma

Description:Interferon gamma, also known as IFNG, is a member of the type 2 interferon family. This protein is a soluble cytokine with antiviral, immunoregulatory and anti-tumor properties and is a potent activator of macrophages. Mutations in this gene are associated with aplastic anemia. Recombinant Feline IFNG protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
