
SELPLG, 42-121aa, Human, His tag, E.coli**Cat.NO.: TP03882**

3th Edition

Synonyms:P-selectin glycoprotein ligand 1 isoform 2 precursor, CD162, CLA, PSGL-1, PSGL1**Description:**SELPLG is a glycoprotein that functions as a high affinity counter-receptor for the cell adhesion molecules P-, E- and L- selectin expressed on myeloid cells and stimulated T lymphocytes. As such, this protein plays a critical role in leukocyte trafficking during inflammation by tethering of leukocytes to activated platelets or endothelia expressing selectins. This protein requires two post-translational modifications, tyrosine sulfation and the addition of the sialyl Lewis x tetrasaccharide (sLex) to its O-linked glycans, for its high-affinity binding activity. Aberrant expression of this gene and polymorphisms in this gene are associated with defects in the innate and adaptive immune response. Alternate splicing results in multiple transcript variants. Recombinant human SELPLG protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.**Form:**Liquid. In 20mM Tris-HCl buffer (pH 8.0) containing 0.15M NaCl, 10% glycerol, 1mM DTT.**Molecular Weight:**10.9 kDa (103aa) confirmed by MALDI-TOF (Molecular size on SDS-PAGE will appear higher)**Sequences:**MGSSHHHHHSSGLVPRGSHMGSQATEYEYLDYDFLPETEPPEMLRNSTDTTPLTGPPTPESTTVEPAARRSTGL
DAGGAVTELTTELANMGNLSTDSAAMEI**Purity:**> 95% by HPLC**Concentration:**0.25 mg/ml (determined by Bradford assay)**Endotoxin Level:**<1.0 EU per 1 ug of protein (determined by LAL method)**Storage:**Can be stored at +4°C short term (1-2 weeks). For long term storage, aliquot and store at -20°C or -70°C. Avoid repeated freezing and thawing cycles.
