

Recombinant Mouse SLAM Family Member 9/SLAMF9/CD2F-10 Protein(C-6His)

Cat.NO.: TP05137

3th Edition

Synonyms:SLAM family member 9;Slamf9

Description:Mouse SLAM family member 9(Slamf9) is a single-pass type I membrane protein. The SLAMF9 gene encodes a member of the signaling lymphocytic activation molecule family. The encoded protein is a cell surface molecule that consists of two extracellular immunoglobulin domains, a transmembrane domain and a short cytoplasmic tail that lacks the signal transduction motifs found in other family members. The slamf9 protein may play a role in the immune response.

Form:PBS

Molecular Weight:24.7 kDa

Sequences:Phe18-Leu230

Purity:> 95% by HPLC

Concentration:

Endotoxin Level:<1.0 EU per 1 ug of protein (determined by LAL method)

Storage:Can be stored at +4°C short term (1-2 weeks). For long term storage, aliquot and store at -20°C or -70°C. Avoid repeated freezing and thawing cycles.
