

**Recombinant Human Prefoldin Subunit 2/PFDN2 Protein(N-6His)**

**Cat.NO.: TP05923**

3th Edition

**Synonyms:**Prefoldin Subunit 2; PFDN2; PFD2

**Description:**Prefoldin Subunit 2 (PFDN2) belongs to the Prefoldin Beta subunit family. The PFDN2 protein is one of six subunits of Prefoldin that act as a molecular chaperone complex that binds and stabilizes newly synthesized polypeptides allowing them to fold correctly. PFDN2 binds specifically to Cytosolic Chaperonin (c-CPN) and transfers target proteins to it. PFDN2 also binds to a nascent polypeptide chain and promotes folding in settings where there are many competing pathways for non-native proteins.

**Form:**PBS

**Molecular Weight:**18.8 kDa

**Sequences:**Met 1-Ser154

**Purity:**> 95% by HPLC

**Concentration:**

**Endotoxin Level:**<1.0 EU per 1 ug of protein (determined by LAL method)

**Storage:**Can be stored at +4°C short term (1-2 weeks). For long term storage, aliquot and store at -20°C or -70°C. Avoid repeated freezing and thawing cycles.
